S. DEEPAKUMAR

Karur, Tamil Nadu | skdeepakumar000@gmail.com | GitHub: github.com/DEEPAK-47-S | LinkedIn: linkedin.com/in/deepakumar-s
Portfolio: deepakumar-portfolio.vercel.app | LeetCode: leetcode.com/u/deepakumar000

PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience developing full-stack web applications, Python/Flask backends, database-driven systems, and responsive interfaces. Project work includes AI-assisted transit-demand planning, student elections, campus management, offline examinations, and citizen grievance platforms. Interested in cybersecurity and software development, with programming experience in Python, JavaScript, and SQL and familiarity with Git, GitHub, and Postman. Seeking internship opportunities to strengthen practical technical and security skills.

EDUCATION

B.E. Computer Science and Engineering — Nehru Institute of Engineering and Technology, Coimbatore
2025–Present | 2nd Year | CGPA: 8.5

TECHNICAL SKILLS

Programming: Python, C, C++, Java, JavaScript
Frontend: HTML5, CSS3, JavaScript, Responsive Web Design
Backend & APIs: Python, Flask, REST API Concepts
Databases: SQLite, PostgreSQL, Supabase, PostGIS
Tools & Platforms: Git, GitHub, Postman, Vercel, Render
Core Concepts: Object-Oriented Programming, Data Structures, Debugging, UI/UX Basics

PROJECTS

FestivalFlow AI – Smart Population & Transit Engine | Project Link

Technologies: Python, Flask, HTML, CSS, JavaScript, Leaflet.js, PostgreSQL/PostGIS, AI/ML libraries, Google OR-Tools

- Developed a predictive transit-planning project concept for crowd distribution and demand forecasting across Tamil Nadu, focused on festival-driven passenger surges.
- Outlined forecasting approaches including LSTM, GRU, SARIMA, XGBoost, and Random Forest in the project repository.
- Designed a map-based monitoring workflow and fleet-optimization approach to support resource allocation between high-demand and low-demand bus hubs.

NIET Student Election – Online Voting System | Project Link

Technologies: Python Flask, SQLite, HTML, CSS, JavaScript

- Developed a web-based student election system with separate voter and administrator workflows.
- Implemented voter registration, one-voter-one-vote validation, duplicate-vote prevention, candidate management, and election result views.
- Added candidate photo uploads, live result refresh, vote-percentage display, and CSV result export.

SmartCampus – Campus Management & ERP Platform | Project Link

Technologies: Web Application, Role-Based Access, Campus Management

- Built a centralized campus-management interface with role-based workflows for administrators, students, faculty, HODs, mentors, and placement staff.
- Organized campus operations through distinct user roles and authentication flows.

Smart Exam Portal for Students | Project Link

Technologies: Python Flask, SQLite, HTML, CSS, JavaScript

- Developed an offline coding-examination portal with separate teacher and student workflows for supervised lab-based assessments.
- Implemented question management, a student coding workspace, local submission/activity tracking, and exam-focused browser controls.
- Designed for college LAN/local-network use; not publicly deployed because it is intended for controlled offline examinations.

Connecting Social Problem – Citizen Grievance & Solution Hub | Project Link

Technologies: React, JavaScript, HTML, CSS, PostgreSQL/Supabase, Vercel

- Developed a platform for users to submit and explore community problems through structured digital reporting.
- Organized reports into categories including roads, water, sanitation, agriculture, environment, and public safety.

TVK CBE North Ward 19 – Complaint Portal | Project Link

Technologies: HTML, CSS, JavaScript, Python Flask, Supabase/PostgreSQL, Render

- Created a complaint-submission and status-tracking website for a local ward.
- Implemented complaint details, location and phone fields, optional image upload, complaint-code generation, and status updates.

OTHER ACADEMIC PROJECTS

Motion Object Detection: Developed a basic application to identify movement in image or video input.
Face Expression Detection: Worked on identifying facial expressions using computer-vision techniques.
E-Commerce Website: Designed a product-oriented website with a responsive user interface.

CERTIFICATIONS & ACHIEVEMENTS

- SAKTHI HACKFEST '26 – 24-Hour Hackathon, Sree Sakthi Engineering College, Coimbatore | 10–11 October 2026 | Generative AI domain (Participation Certificate)
- 30 Days MasterClass in FullStack Development — NoviTech R&D Private Limited | Jan–Feb 2026
- 30 Days MasterClass in Artificial Intelligence — NoviTech R&D Private Limited | Mar–Apr 2026
- 30 Days MasterClass in UI/UX Design — NoviTech R&D Private Limited | Apr–May 2026
- Frontend Bootcamp: Events in JavaScript — NoviTech R&D Private Limited | Feb 2026
- API Working + Postman Introduction — NoviTech R&D Private Limited
- 2-Hour Skill Camp: From Click to Hack – How Cyber Attacks Happen — NoviTech R&D Private Limited | Apr 2026
- 2-Hour Skill Camp: AI-Driven IT Sectors — NoviTech R&D Private Limited | Apr 2026
- 2-Hour ATS Resume Optimization Workshop — Tech Drew | May 2026
- UI/UX Webinar — certificate uploaded; certificate text not machine-readable

INTERNSHIP

Incoming Cybersecurity Intern — AEX Xenora Technologies
Company Website: xenoratechnologies.in
